SUBJECT INDEX

PAGE

Astrophysics

The influence of line blanketing upon the colours of cepheids and F–K supergiants, *R. A. Bell and A. W. Rodgers* 161
Ionization equilibrium with negative ion formation, *T. R. Carson* 409
The ionization equilibrium of elements between carbon and nickel, *Carole Jordan* 501

Astronomical instruments

Contributions to the theory of intensity interferometry, *R. H. T. Bates* 413

Extragalactic nebulae

A new analysis of the Hubble counts of galaxies—I. The galactic absorption function, *G. de Vaucouleurs and G. M. Malik* 387

Galactic nebulae

High resolution observations of bright emission nebulae at 408 MHz, *P. A. Shaver* ... 273
High density condensations in H II regions, *D. A. Mendis* 441
High resolution observations of the radio source W 49, *C. C. Wynn-Williams* 453

Interstellar matter

Spherical harmonic analysis of interstellar polarization, *P. A. H. Seymour* 33
Dissociation–ionization fronts in interstellar gas clouds—III. The structure and propagation of *D*-type fronts and their associated shock fronts, *D. A. Mendis* 241
Interstellar clouds, *M. V. Penston, V. Ann Munday, D. J. Strickland and Margaret J. Penston* 355
The collapse of interstellar gas clouds and the formation of stars, *James H. Hunter, Jr* ... 473

Radio astronomy

Interferometric measurement of polarization distribution in radio sources, *R. G. Conway and P. P. Kronberg* 11
An absolute flux density scale at 408 MHz, *D. V. Wyllie* 229
High resolution observations of bright emission nebulae at 408 MHz, *P. A. Shaver* 273
Lunar occultations of radio sources at 81·5 MHz, *R. A. Collins and P. F. Scott* 317
Gravitational bounce in general relativity, *H. Bondi* 333
High resolution observations of the radio source W 49, *C. G. Wynn-Williams* 453

Saturn

Stability analysis of Saturn's rings with differential rotation—II, *Shin Yabushita* 201

Solar physics

The ultra-violet resonance lines of neutral helium from the Sun, *A. G. Hearn*... 53
The abundances of the elements in the solar photosphere—VII. Zn, Ga, Ge, Cd, In, Sn, Hg, Tl and Pb, *D. L. Lambert, E. A. Mallia and B. Warner* 71
The interpretation of the wing of the solar line Hα, *Gillian Gompertz and W. R. Hindmarsh* 97
A suggestion for the measurement of He II line intensities emitted by the Sun, *A. G. Hearn* 259

Solar system

The motions of minor planets close to commensurabilities with Jupiter, *A. T. Sinclair* ... 289

Spectroscopy

Atomic oscillator strengths—VI. Transitions of the type p^2–ps, *B. Warner and R. C. Kirkpatrick* 265

Continuous absorption by members of the Li isoelectric sequence, *M. R. C. McDowell and Edward S. Chang* 465

Stars—atmospheres

A rediscussion of p Velorum, *David S. Evans* 523

Stars—binary

The radial velocity curve of the eclipsing binary system 9 Chamaeleontis (BV 430), *C. R. Chambliss* 113

Orbits of two O-type spectroscopic binaries HD 93403 and 135240, *A. D. Thackeray and B. Emerson* 429

Stars—structure of

Pulsational properties of a massive star in the helium burning phase—II, *C. Prasad and C. Mohan* 151

Stars—variable

Nova T Pyxidis, *R. M. Catchpole* 119

An analysis of the cepheid variable RT Aurigae, *M. K. V. Bappu and Nirupama Raghavan* 295

Spectrophotometric observations of the magnetic variable HD 125248, *M. S. Hockey* ... 543

Universe—cosmology and relativity

Number counts of extragalactic radio sources, *R. Ringenberg and G. C. McVittie* 1

On the rotation of the Universe, *Stephen Hawking* 129

Observations in some simple cosmological models with shear, *P. T. Saunders* 213

Zodiacal light

Theoretical Fraunhofer line profiles in the spectrum of the zodiacal light, *J. F. James* ... 45

SUBJECT INDEX

Astrophysics PAGE

The formation and growth of carbon particles in the atmospheres of cool carbon stars, *John D. Fix* 37
The formation and growth of carbon particles in atmospheres of Mira variables, *John D. Fix* 51
Production of proton-rich heavy shielded elements in the stars, *A. Agnese, M. La Camera and A. Wataghin* 57
Resonances in collision strengths for excitation of [O II] and [O III], *W. Eissner, P. de A. P. Martins, H. Nussbaumer, Hannelore E. Saraph and M. J. Seaton* 63
The analysis of the low gravity halo star HD 214539, *A. Przybylski* 71
The collapse of interstellar gas clouds—IV. Models of collapse and a theory of star formation, *M. J. Disney, D. McNally and A. E. Wright* 123
The ionization structure of planetary nebulae—VII. The heavy elements, *D. R. Flower* ... 171
Hydromagnetic stability of a galactic slab with halo, *Meera Aggarwal and S. P. Talwar* ... 187
Magnetothermal instability in a rotating gravitating fluid, *Meera Aggarwal and S. P. Taylor* 235
The ionization structure of planetary negulae—VIII. Models of the nebulae NGC 7662 and IC 418, *D. R. Flower* 243
The formation of stars with particular application to temporary stars and quasars, *I. P. Williams* 339
An exact solution in the theory of line formation, *C. E. Siewert and M. N. Özişik* 351
The effects of Čerenkov light pulses on a stellar intensity interferometer, *R. Hanbury Brown, J. Davis and L. R. Allen* 399
On H II regions and pulsar distances, *A. J. R. Prentice and D. ter Haar* 423

Galactic structure

Numerical experimental check of Lynden-Bell statistics—II. The core–halo structure and the role of the violent relaxation, *Sami Cuperman, Shyke Goldstein and Myron Lecar* 161
On H II regions and pulsar distances, *A. J. R. Prentice and D. ter Haar* 423

Gas dynamics

The collapse of interstellar gas clouds—IV. Models of collapse and a theory of star formation, *M. J. Disney, D. McNally and A. E. Wright* 123
Hydromagnetic stability of a galactic slab with halo, *Meera Aggarwal and S. P. Talwar* ... 187
Magnetothermal instability in a rotating gravitating fluid, *Meera Aggarwal and S. P. Talwar* 235
The hydrodynamics of the helium flash, *Alan C. Edwards* 445

Instruments

A rapid scanning low noise spectrometer for study of sunspot spectra, *D. E. Blackwell, E. A. Mallia and A. D. Petford* 93
The effects of Čerenkov light pulses on a stellar intensity interferometer, *R. Hanbury Brown, J. Davis and L. R. Allen* 399

Interstellar matter

The collapse of interstellar gas clouds—IV. Models of collapse and a theory of star formation, *M. J. Disney, D. McNally and A. E. Wright* 123
The formation of stars with particular application to temporary stars and quasars, *I. P. Williams* 339

Magellanic clouds

Further observations of Magellanic cloud cepheids, *S. C. B. Gascoigne* 1

Moon

A note on the evaluation of the latitude of the Moon, *W. J. Eckert, T. C. Van Flandern and G. A. Wilkins* 473

Photometric studies

On the instrumental profile of the *Utrecht Photometric Atlas*, *M. Minnaert* 91
Photometry of NGC 4103, *A. J. Wesselink* 329
Absolute magnitudes of Mira variables from statistical parallaxes, *M. L. Clayton and M. W. Feast* 411

Planetary nebulae

The ionization structure of planetary nebulae—VII. The heavy elements, *D. R. Flower* ... 171
The ionization structure of planetary nebulae—VIII. Models of the nebulae NGC 7662 and IC 418, *D. R. Flower* 243

Radio astronomy

Interferometric observations with a baseline of 127 kilometres—I, *W. Donaldson, G. K. Miley, H. P. Palmer and H. Smith* 213
High resolution observations of Cygnus A at 2·7 GHz and 5 GHz, *Simon Mitton and Martin Ryle* 221
Extension of the radio source luminosity function—I. Observations, *M. D. Windram and S. Kenderdine* 265
Long baseline interferometer, observations at 408 and 448 MHz—I. The observations, *N. W. Broten, R. W. Clarke, T. H. Legg, J. L. Locke, J. A. Galt, J. L. Yen and R. M. Chisholm* 313
Observations of the structure of radio sources in the 3C catalogue—III. The absolute determination of positions of 78 compact sources, *B. Elsmore and C. D. Mackay* 361
Long baseline interferometer observations at 408 and 448 MHz—II. The interpretation of the observations, *R. W. Clarke, N. W. Broten, T. H. Legg, J. L. Locke and J. L. Yen* ... 381

Solar spectroscopy

A rapid scanning low noise spectrometer for study of sunspot spectra, *D. E. Blackwell, E. A. Mallia and A. D. Petford* 93

Stars—atmospheres of

The formation and growth of carbon particles in the atmospheres of cool carbon stars, *John D. Fix* 37
The formation and growth of carbon particles in the atmospheres of Mira variables, *John D. Fix* 51
An exact solution in the theory of line formation, *C. E. Siewert and M. N. Özişik* 351

Stars—clusters of

The open cluster IC 2581, *T. Lloyd Evans* 101
Membership of the Coma star cluster, *A. N. Argue and Cecilia M. Kenworthy* 479

Stars—magnetic

On the theory of rotating magnetic stars, *G. A. E. Wright* 197

Stars—radial velocities of

The radial velocities of 335 late B-type stars, *Douglas P. Hube*, published in *Memoirs* Volume 72 Part 5 233

Stars—spectra of

The analysis of the low gravity halo star HD 214539, *A. Przybylski* 71

Stars—structure and evolution of

Production of proton-rich heavy shielded elements in the stars, *A. Agnese, M. La Camera and A. Wataghin* 57
On the theory of rotating magnetic stars, *G. A. E. Wright* 197
The hydrodynamics of the helium flash, *Alan C. Edwards* 445

Stars—variable

Further observations of Magellanic cloud cepheids, *S. C. B. Gascoigne* 1

Universe—cosmology—relativity

Numerical experimental check of Lynden-Bell statistics—II. The core–halo structure and the role of the violent relaxation, *Sami Cuperman, Shyke Goldstein and Myron Lecar* ... 161
